Section 1

HW2

2/13/16

Problem 1

Assuming that input is at least 2 binary numbers long.

NFA 20/20 pts

$\langle S, s, F, T \rangle$

$S = \{S0, S1, S2\}$

$s = S0$

$F = \{S2\}$

$T =$

| State | | 0 | 1 | Input |
|-------|----|--------|----|-------|
| | S0 | S0, S1 | S0 | |
| | S1 | S2 | S0 | |
| | S2 | S2 | S0 | |

See next page for DFA

DFA

$\langle S, s, F, T \rangle$

$S = \{S0, S1, S2\}$

$s = S0$

$F = \{S2\}$

$T =$

| State | | 0 | 1 | Input |
|-------|----|----|----|-------|
| | S0 | S1 | S0 | |
| | S1 | S2 | S0 | |
| | S2 | S2 | S0 | |

Problem 2

Sub-part 1

12/40

Non-CFL

Pumping Lemma

Let $s = aaabbbccc$

$m=n=o=3$

$p=9$

$u=aa, v=ab, x=b, y=bc, z=cc$

$|vy| = 2 + 2 = 4 > 0$

$|vxy| = 2+1+2 \leq 9$

Let $i=2$

$uv^2xy^2z = aaababbbcbccc$ which does not belong to the language. Contradiction.

Therefore, the language is a Non-CFL.

Regex = $a^*b^+c^+$

Sub-part 2

Non-CFL

Pumping Lemma

Let $s = aaaabbbccc$

$m=4, n=o=3$

$p=10$

$u=aaa, v=ab, x=b, y=bc, z=cc$

$|vy| = 2 + 2 = 4 > 0$

$|vxy| = 2+1+2 \leq 10$

Let $i=2$

$uv^2xy^2z = aaaababbbcbccc$ which does not belong to the language. Contradiction.

Therefore, the language is a Non-CFL.

No regular expression.

Sub-part 3

Non-CFL

Pumping Lemma

+4

Let $s = aaabbbccc$

$m=n=o=3$

$p=9$

$u=aa, v=ab, x=b, y=bc, z=cc$

$|vy| = 2 + 2 = 4 > 0$

$|vxy| = 2+1+2 \leq 9$

Let $i=2$

$uv^2xy^2z = aaababbbcbccc$ which does not belong to the language. Contradiction.

Therefore, the language is a Non-CFL.

No regular expression.

Sub-part 4

Non-CFL

Pumping Lemma

Let $s = aaaabbbbbbb$

$n=2$

$p=10$

$u=aaa, v=ab, x=b, y=bb, z=bb$

$$|vy| = 2 + 2 = 4 > 0$$

$$|vxy| = 2+1+2 \leq 10$$

Let $i=2$

$uv^2xy^2z = aaaababbbbbb$ which does not belong to the language. Contradiction.

Therefore, the language is a Non-CFL.

No regular expression.

Sub-part 5

Non-CFL

Pumping Lemma

Let $s = aabbaa$

$w=aab, w^R=baa$

$p=6$

$u=a, v=ab, x=b, y=a, z=a$

$$|vy| = 2 + 1 = 3 > 0$$

$$|vxy| = 2+1+1 \leq 6$$

Let $i=2$

$uv^2xy^2z = aababbaaa$ which does not belong to the language. Contradiction.

Therefore, the language is a Non-CFL.

No regular expression.

Sub-part 6

Non-CFL

Pumping Lemma

Let $s = bbbbcccc$

$n=0, m=4$

$p=8$

$u=bbb, v=bc, x=c, y=c, z=c$

$$|vy| = 2 + 1 = 3 > 0$$

$$|vxy| = 2+1+1 \leq 8$$

Let $i=2$

$uv^2xy^2z = bbbbcbbcccc$ which does not belong to the language. Contradiction.

Therefore, the language is a Non-CFL.

No regular expression.

Sub-part 7

+4

Non-CFL

Pumping Lemma

Let $s = bbbbdddd$ $n=0, m=4$ $p=8$ $u=bbb, v=bd, x=d, y=d, z=d$ $|vy| = 2 + 1 = 3 > 0$ $|vxy| = 2+1+1 \leq 8$ Let $i=2$ $uv^2xy^2z = bbbbdddd$ which does not belong to the language. Contradiction.

Therefore, the language is a Non-CFL.

No regular expression.

Sub-part 8

Non-CFL

Pumping Lemma

Let $s = cccddddd$ $n=0, m=4$ $p=8$ $u=ccc, v=cd, x=d, y=d, z=d$ $|vy| = 2 + 1 = 3 > 0$ $|vxy| = 2+1+1 \leq 8$ Let $i=2$ $uv^2xy^2z = cccddddd$ which does not belong to the language. Contradiction.

Therefore, the language is a Non-CFL.

No regular expression.

Sub-part 9

Non-CFL

Pumping Lemma

Let $s = aaaabbbb$ $n=2$ $p=8$ $u=aaa, v=ab, x=b, y=b, z=b$ $|vy| = 2 + 1 = 3 > 0$

$$|vxy| = 2+1+1 \leq 8$$

Let $i=2$

$uv^2xy^2z = aaaababbbb$ which does not belong to the language. Contradiction.

Therefore, the language is a Non-CFL.

No regular expression.

Sub-part 10

CFL

+4

The CFG in BNF notation is $\langle T, N, P, S \rangle$ where:

Terminal $T = a, b$

Non-Terminal $N = \langle w \rangle, \langle \text{alph} \rangle$

Production Rules P

1. $\langle w \rangle \rightarrow \langle \text{alph} \rangle \langle \text{alph} \rangle \langle \text{alph} \rangle \langle \text{alph} \rangle \langle \text{alph} \rangle \langle \text{alph} \rangle$
2. $\langle \text{alph} \rangle \rightarrow a|b| \langle \text{alph} \rangle \langle \text{alph} \rangle$

Start $S = \langle w \rangle$

Regex = $(a|b)(a|b)(a|b)(a|b)(a|b)(a|b)^+$

Problem 3 on next page

Problem 3

Sub-part 1

Leftmost Derivation

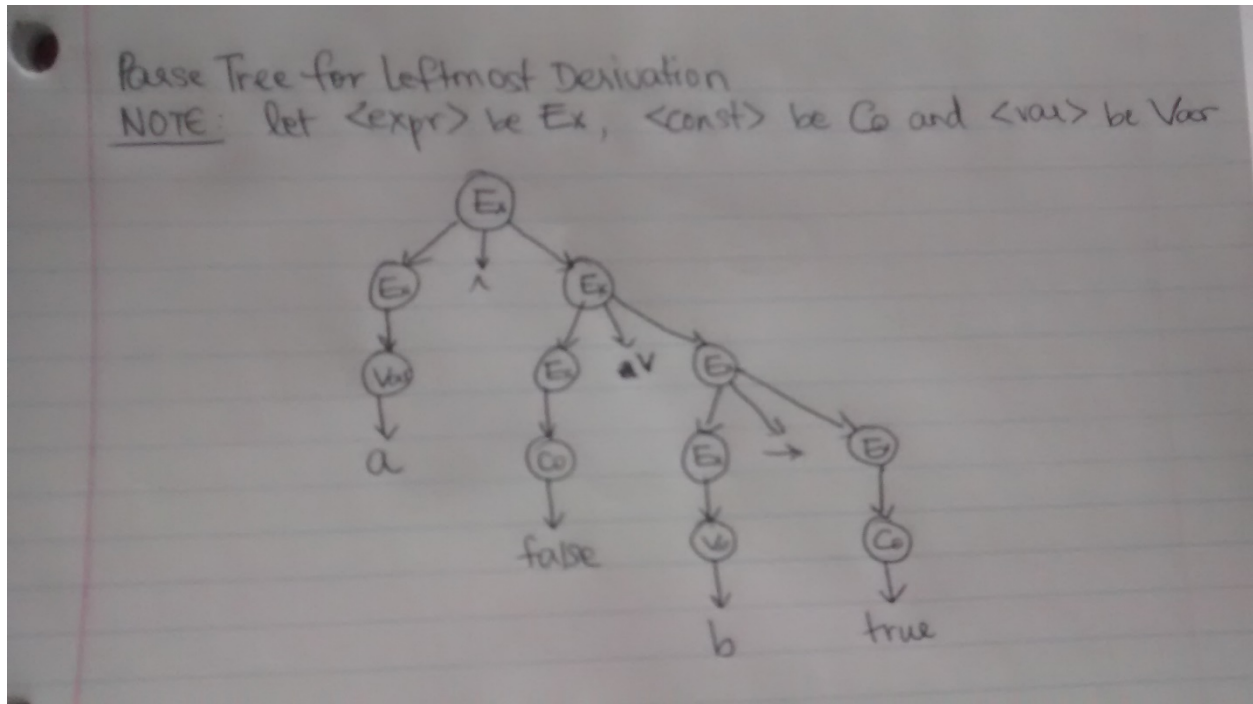

| Rule | Sentential Form |
|------|--|
| 1 | $\langle \text{expr} \rangle$ |
| 2 | $\langle \text{expr} \rangle \wedge \langle \text{expr} \rangle$ |
| 2 | $\langle \text{var} \rangle \wedge \langle \text{expr} \rangle$ |
| 4 | $a \wedge \langle \text{expr} \rangle$ |
| 2 | $a \wedge \langle \text{expr} \rangle \vee \langle \text{expr} \rangle$ |
| 2 | $a \wedge \langle \text{const} \rangle \vee \langle \text{expr} \rangle$ |
| 3 | $a \wedge \text{false} \vee \langle \text{expr} \rangle$ |
| 2 | $a \wedge \text{false} \vee \langle \text{expr} \rangle \rightarrow \langle \text{expr} \rangle$ |
| 2 | $a \wedge \text{false} \vee \langle \text{var} \rangle \rightarrow \langle \text{expr} \rangle$ |
| 4 | $a \wedge \text{false} \vee b \rightarrow \langle \text{expr} \rangle$ |
| 2 | $a \wedge \text{false} \vee b \rightarrow \langle \text{const} \rangle$ |
| 3 | $a \wedge \text{false} \vee b \rightarrow \text{true}$ |

Rightmost Derivation

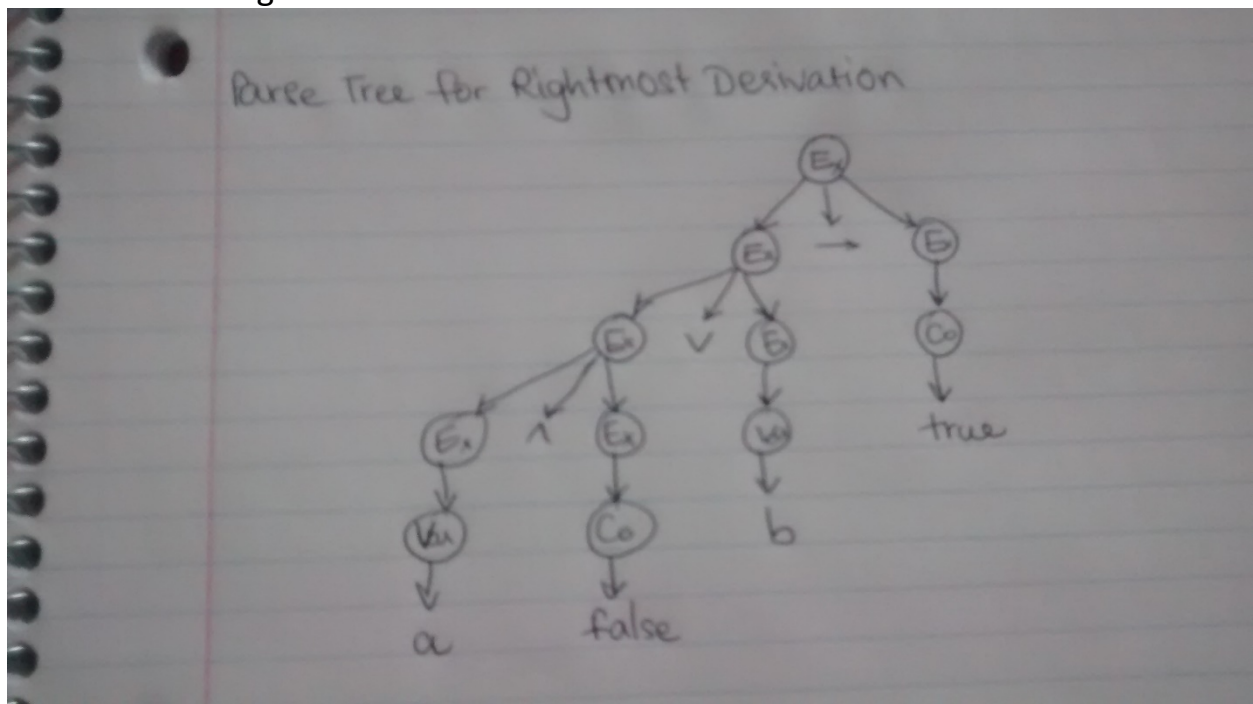

| Rule | Sentential Form |
|------|--|
| 1 | $\langle \text{expr} \rangle$ |
| 2 | $\langle \text{expr} \rangle \rightarrow \langle \text{expr} \rangle$ |
| 2 | $\langle \text{expr} \rangle \rightarrow \langle \text{const} \rangle$ |
| 3 | $\langle \text{expr} \rangle \rightarrow \text{true}$ |
| 2 | $\langle \text{expr} \rangle \vee \langle \text{expr} \rangle \rightarrow \text{true}$ |
| 2 | $\langle \text{expr} \rangle \vee \langle \text{var} \rangle \rightarrow \text{true}$ |
| 4 | $\langle \text{expr} \rangle \vee b \rightarrow \text{true}$ |
| 2 | $\langle \text{expr} \rangle \wedge \langle \text{expr} \rangle \vee b \rightarrow \text{true}$ |
| 2 | $\langle \text{expr} \rangle \wedge \langle \text{const} \rangle \vee b \rightarrow \text{true}$ |
| 3 | $\langle \text{expr} \rangle \wedge \text{false} \vee b \rightarrow \text{true}$ |
| 2 | $\langle \text{var} \rangle \wedge \text{false} \vee b \rightarrow \text{true}$ |
| 4 | $a \wedge \text{false} \vee b \rightarrow \text{true}$ |

Sub-part 2 **10/10 pts**

Parse Tree for Left Derivation

Parse Tree for Right Derivation

Sub-part 3

AST for leftmost derivation

AST for rightmost derivation

Sub-part 4

It is ambiguous because in sub-part 2, we should 2 distinct parse trees that have the same root $\langle \text{expr} \rangle$ and yield the same output $a \wedge \text{false} \vee b \rightarrow \text{true}$.

5 ptrs

Sub-part 5

1. $\langle \text{start} \rangle ::= \langle \text{expr} \rangle$
2. $\langle \text{expr} \rangle ::= \langle \text{expr} \rangle \rightarrow \langle \text{expr} | \text{const} | \text{var} \rangle | \langle \text{const} | \text{var} \rangle$
3. $\langle \text{expr} \rangle ::= \langle \text{expr} | \text{const} | \text{var} \rangle \wedge \langle \text{expr} \rangle | \langle \text{const} | \text{var} \rangle$
4. $\langle \text{expr} \rangle ::= \langle \text{expr} \rangle \vee \langle \text{expr} | \text{const} | \text{var} \rangle | \langle \text{const} | \text{var} \rangle$
5. $\langle \text{const} \rangle ::= \text{true} | \text{false}$
6. $\langle \text{var} \rangle ::= a | b | c | \dots | z$

cannot guarantee right associative

no such expression

5 ptrs

has similar problems to the above

Sub-part 6

Parse Tree

AST (see next page)
